

FURON[®] HIGH FLOW PUMP

AIR OPERATED,
BELLOWED PUMP

100 LMP/26 GPM

Furon High Flow Pumps are designed to handle ultra-high purity media and are constructed with no metal parts. All wetted parts are manufactured from high purity PFA and PTFE and are suitable for pumping even the most aggressive chemicals. All other (non-wetted) components are manufactured from advanced engineering thermoplastics and for some include fiber reinforcement to enable premium performance even at elevated temperatures.

Furon High Flow Pumps are self-priming, providing an easy installation and setup for a high purity 100% metal-free pump.
